

On-Wall Speaker

RAPTOR ON-WALL

wilson

UNIVERSAL ON-WALL SPEAKERS

Wilson Raptor On-Wall speakers are synonymous with audio quality available at an affordable price. Versatile in their application, they suit the needs of both stereo music lovers and home theater enthusiasts.

STEREO, HOME CINEMA AND EVEN DOLBY ATMOS APPLICATIONS

Our speakers are ideal as stereo, front, surround or even Dolby Atmos speakers, depending on the preferred home theater configuration, starting with 5.1 systems. Their design has been optimized for wall mounting, which translates into the highest quality sound.

SIMPLY AND ELEGANT DESIGN

The On-Wall Raptors are distinguished by their simplicity of design. They offer a myriad of placement options for best sound reproduction. For an optimal stereo experience, they are best mounted at ear height, opposite the listening position.

EASY INSTALLATION

Mounting is made easy by the presence of a metal mount with key-shaped hole on the speaker's back panel – all you need to do is select the right screws for your wall type. Their compact, flat enclosures fit perfectly into the space of even small rooms, adding a modern touch while maintaining a minimalist aesthetic.

PERFECT FIT FOR THE RAPTOR FAMILY

You can easily compose On-Wall speakers with other Wilson Raptor Series speakers to create your own perfect home theater, as those share the same style and finishes with the other brothers of the Raptor family.

You'll find the same attention to quality of best-in-class materials and components of acoustical and electrical design, so there are secure, gold-coated screw terminals for secure cable connection. They are positioned so that no matter where they are located, they do not present a challenge to the user, yet are not visible in normal use.

ACOUSTICALLY NEUTRAL GRILLE FABRIC

There are also black grills made of acoustically neutral fabric that can mask technical elements of the design.

DRIVERS AND ACOUSTICS

The heart of the system is a 1" soft dome tweeter and a 5" mid/bass driver. As in other Raptor speakers, aluminum voice coils are used here as well, which at high volume levels provide effective protection against overheating of the drivers themselves.

CLASSIC FINISH COLORS

The color scheme of the finish is also perfectly aligned with the other designs of the Raptor series, i.e. classic colors – white and black, emphasizing the elegant appearance and not disturbing the aesthetics of the listening room.

SPECIFICATION

Type	Wall-mounted loudspeaker column,
System	For stereo and home theater systems
Frequency response [± 3] dB [Hz]	Bass Reflex, front positioned port
Sensitivity [2.83V/1m] [dB]	55-20,000 Hz
Impedance	86 dB
Maximum SPL [dB].	4-8 ohms
Recommended amplifier power	106 dB
Crossover frequency [Hz]	25-125 W
Tweeter	2800 Hz
Low-midrange	1" (25 mm) soft dome, neodymium magnet
Connection output(s)	1 x 5" (125 mm)
Accessories included	stereo +/-; banana connectors
Available finishes	4x rubber spacer feet,
Dimensions	integrated metal mounting bracket
Net weight [1 pc].	black, white
Packaging	390 x 250 x 120 mm (H x W x D without grille)

Finish color: White, wood structure
Grill color: Black
EAN: 5905359840381

Finish color: Black, wood structure
Grill color: Black

RAPTOR SERIES

Raptor is our most extensive and versatile line of loudspeakers. They allow you to precisely select the size and power to suit your needs. The wide selection of floorstanders will provide ample power and high quality sound in both small living rooms and large listening rooms.

The possible combinations of multi-channel home theater systems allow for any configuration with both bookshelf and on-wall speakers. In addition, the versatility of the Raptor X speaker allows you to create an over-column configuration for Dolby Atmos upper-layer listening, while the Raptor On-Wall will suit best as a front, surround or even PA solutions speaker.

Stereo enthusiasts will also find a great deal of flexibility in choice to suit their needs and room.
